

PariPoser® Interconnect 0.4mm Pitch

PariPoser® material is an anisotropic conductive elastomer. It conducts an electric current vertically through the elastomer, not horizontally.

RECOMMENDED PCB SPECIFICATIONS

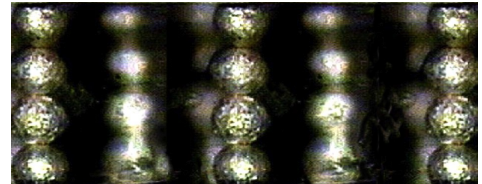

Pitch of Pads	0.4mm
Pad Diameter	0.24mm
Gap between Pads	0.16mm
Pad Height (combined)	0.035mm

MECHANICAL PROPERTIES

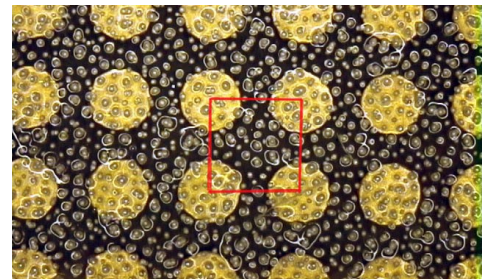

Contact Length	0.11mm
Typical Compression	0.03mm (30%)
Out Gassing (CVCN)	0.07%
Loading	8g/pad

ELECTRICAL CHARACTERISTICS

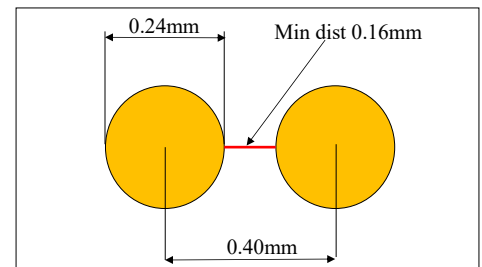

CRES	20mΩ
Bandwidth (S21)	>90GHz
Current Rating	6 amps per pad
Normalized Thermal Conductivity	4500W/m ² K
Breakdown Voltage	Exceeds breakdown of FR-4

Cross section view of PariPoser® material

30 to 50 BallWires per pitch square

Recommended Pad Diameter/Pitch

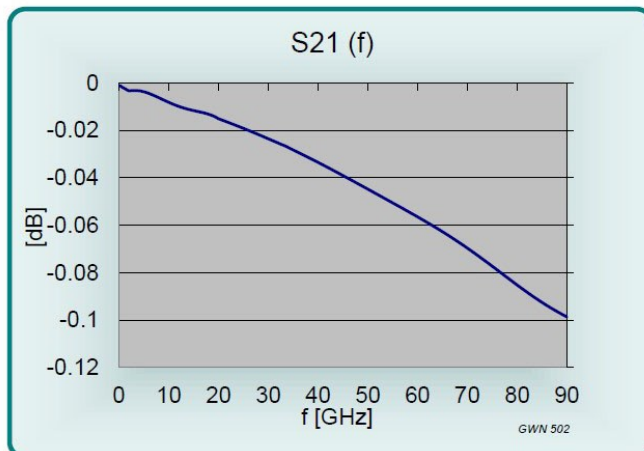

Recommended Pad Height

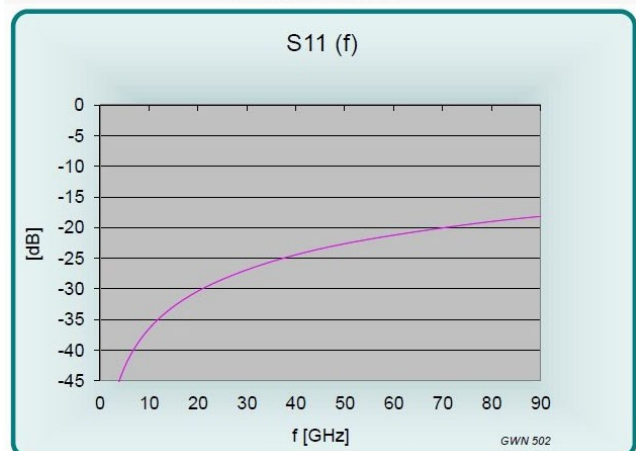

Ordering options for PariPoser®

Curing	Formulation
Regular	Silver
Space	Gold
Non-Stick	Thermal Silver
Special	Thermal Gold
